

Section 1.56.

4. Upon information and belief, the '939 patent is partially inoperative by reason of claiming less literally than I had a right to claim in the patent and because of the resultant error in the literal scope of the claims; namely, by limiting all of the claims of the patent to the recitation of elements unnecessary to define the invention in a literal reading in its broadest aspects (although not believed to be so limiting under the doctrine of equivalents and other legal principles), and primarily by reason of the specific wording of all of the claims to specifically recite that the positioning means positions the displays in vertically registered relationship and in horizontally registered relationship, and further that a "base member" for supporting the supporting means and the arm assembly.

5. The differences and similarities between the existing patent claims (which are to be reissued in their present form, without change) and new claim 16 (which is requested to be added by reissue) are indicated below, wherein language deleted from that of corresponding existing claims is bracketed:

16. A display system comprising:

[a base member;]

a pair of electronic displays[, each of the displays having an operative angular orientation relative to horizontal];

positioning means for positioning the displays [selectively in vertically registered relationship and in horizontally registered relationship], the positioning means comprising:

(a) an arm assembly for supporting the displays;
